

Bamboo

Pure nature in bed

Bamboo yarn is made from 100% bamboo pulp fiber that, as a totally biodegradable

and sustainable natural product, is fast becoming the most eco-friendly material of the 21st century.

Inherently anti-bacterial, Bamboo is the ideal mattress ticking for people with allergies. Once harvested, the bamboo is ground to a pulp from which silky soft threads are spun. As a natural material with high breathability and ventilation, Bamboo fabric has an excellent cooling and refreshing quality. The microscopic gaps in the bamboo fiber ensure that bamboo fabric always feels cool and fresh. They also prevent the cloth from sticking to the skin in warm weather—a form of natural “air-conditioning”, if you will. This microstructure also gives Bamboo ticking its suppleness, and silky and luxurious feel.
